

GARDEX

Lateral filing cabinets

GARDEX has shown, with this series, that a filing cabinet can be elegant as well as secure. All 2, 3 or 4 drawer GARDEX fire-resistant lateral filing cabinets come equipped with gang lock, selective locking system, suspension system and a 3-arm SwayGard system to minimize torque. We also offer an optional caster base and individual key locks or combination locks on one or more individual drawers.

All drawers come equipped with integral rails for left to right filing of documents. Cross rails for back to front filing are available at no extra charge.

The GARDEX "INTERLOCK" system allows only one drawer to open at any time to prevent tipping

Optional equipment

A series of optional equipment is offered for easy filing of all document sizes.

Interior cross tray, to be set on inside drawer. Permits the filing of cheques and cards of various dimensions.

Factory-installed drawer-in-a-drawer, with its own suspension system. Optional card file inserts allow it to accommodate cards, cheques and/or cross trays.

Drawer Dividers. Metal plates for separation in drawers.

Security locks. Independent security can be added for one or more drawers with optional key locks, combination locks, or both.

Caster base.

For more options see accessories price list.
