Professional Security & Charging for Devices

Universal Cabinets Selection Guide

Schools are undergoing an unprecedented transformation in how children are learning. Books and papers are being replaced by tablets and Chromebooks. But with this influx of devices, there are several challenges that teachers and school administrators now face when dealing with the physical impact of devices in the classroom.

- Most classrooms have a limited number of power outlets, and even multi-device power strips might not be sufficient if a classroom or lab has a dozen or more devices.
- The process of collecting and deploying the devices in a classroom could easily compromise valuable learning time.
- Losing devices to theft not only leads to lost learning opportunities, it could also be a huge financial hurdle to replace them.

Charge & Sync Cabinet for Universal Tablets

Providing a convenient and secure storage location for tablets in classrooms just got easier. The Kensington Charge & Sync Cabinet, Universal Tablet has space for up to 10 tablets including the iPad®, Microsoft® Surface™, Galaxy Tab®, and more. The adjustable drawers can even accommodate tablets that you have put in a protective rugged case.

AC12 Security Charging Cabinet

The AC12 Security Charging Cabinet features slide-out drawers that provide an easier check-in/check-out experience for teachers or administrators. The cabinet holds 12 devices measuring up to 14", and with the cabinet running on AC power, it can safely charge all 12 devices simultaneously.
